Fri, 07 Dec 2018 17:33:00 GMT Grid Design - New Mexico Institute of Mining and Technology - A stochastic simulation is a simulation that traces the evolution of variables that can change stochastically with certain probabilities.. With a stochastic model we create a projection which is based on a set of random values. Outputs are recorded and the projection is repeated with a new set of random values of the variables. These steps are repeated until a sufficient amount of data is ...
